

Advanced Well Control Workshop

Duration:	3 Days	Maximum Number of Attendees:	15
Designed for:	Senior operational and engineering personnel involved in drilling / workover operations; OIMs, Drilling Superintendents, Drilling Engineers, Drilling Supervisors, Toolpushers and Drillers who have prior well control knowledge and certification.		
Course Overview:	<p>The Advanced Well Control course involves senior drilling personnel in a combination of theoretical and practical team based workshops to highlight well control issues. The inclusion of case histories and group discussion provides a forum for addressing client-specific well control challenges and lessons learned.</p> <p>Welltrain provides two highly experienced IWCF accredited instructors and utilises an effective blend of classroom theory, individual exercises, group discussion, case histories and drilling simulator practice.</p>		
Course Content:	<p>The following topics may be addressed, subject to customisation requests:</p> <ul style="list-style-type: none">• Well control management, methods and primary well control• Understanding fluids and pressure• Dynamic wellbore pressures• Blowout prevention (BOP) and well control equipment including subsea control systems• Causes of kicks, kick warning signs and diverting shallow gas kicks• Handling kicks while out of the hole and in special situations• Kick tolerance and leak-off test interpretation• Shut-in procedures• Deviated (Horizontal) well control• Stripping operations• Downhole and equipment problems during well control• Horizontal well control issues• Deepwater well control practices and challenges• Volumetric well control methods (static and dynamic)• High Pressure High Temperature (HPHT) well control challenges• Gas behaviour and gas migration versus equipment and well design• Client specific/relevant operational case histories• Client lessons learned• Simulator practice		
Course Inclusions:	<ul style="list-style-type: none">• Light lunch, tea/coffee and snacks each day.• Provision of detailed technical manuals (print copy) during course• Welltrain certificates of attendance (documenting training topics) for each participant		
Course Options:	This course can be fully customised to address specific drilling campaign requirements. Trainers can be provided to site including offshore rigs.		
Course Fees:	\$AU 3000 (inc GST) - 3 day course for up to 15 participants based on delivery at our dedicated training facility in Perth. Expenses will be charged for on-site delivery. Additional fees may apply for customisation – a fully costed proposal will be provided upon request.		
Course Dates:	April 2012: 10th-12th September 2012: 17th-20th
