

Introduction to the Oil & Gas Industry

Duration: 1 Day **Maximum Number of Attendees:** 18

Designed for: Personnel who work in any area of the oil and gas industry and would benefit from an understanding of the terminology and processes of the industry.

Ideal for personnel in non-engineering disciplines such as Human Resources, Procurement, Finance, IT, Administration, Public Affairs, Sales and Marketing or operational and technical support functions.

Course Overview: The **Introduction to the Oil & Gas Industry** course provides non-technical personnel with a comprehensive overview of the terms and processes involved in the various branches and disciplines of the petroleum industry.

The course begins by asking the intriguing question “What would life be like without oil?” and then takes participants on the fascinating journey from exploration and drilling, completions and production to refining and transportation. The course concludes by looking to the future structure and development of the oil and gas industry.

Course Content: The following topics are addressed:

- The nature of oil and gas – crude oil / natural gas
- The processes that occur upstream and downstream
- Exploration – formation oil and gas; the finding of oil and gas
- Drilling – types of rigs, major rig systems, drilling operations and challenges
- Completion and production: purpose and types, reservoir drives, recovery methods
- Refining and transportation: a typical refinery, refining processes, getting product to market
- Industry structure and development: early industry/the structure today/the oil and gas market in the future

Course Inclusions:

- Light lunch, tea/coffee and snacks.

Course Fees: \$AU 1,500 (inc GST)
